

Development Permit Application Package

StrathmoreRURAL REIMAGINED

RESIDENTIAL BASEMENT

Version 1 – October 2021

Development Permit Application Requirement List **Basement Development**

Please check off the following information which is required to facilitate a thorough evaluation and timely decision on your application. All information and material for this application must be complete, clear, legible and precise. The processing of your application will be put on hold status until the complete information is submitted.

Only complete applications will be accepted.

Strathmore

Applicant Use	Office Use	Required Documents and Information
		Basement Development Information Sheet
		2. Building Permit Application
		3. Building Permit Fee
		4. Performance Security
		5. Floor Plan Drawing please include labels showing the use of each room. The Basement
		Development Information Sheet includes an exhaustive list of what needs to be included on
		the floor plan.
		6. Fire Safety Plan
		7. Electrical Permit
		8. Plumbing Permit

Applicant's Signature:	Date:	
(Confirming that all required information has been provided is correct and complete)		

TIMING FOR BUILDING INSPECTIONS

To arrange an inspection, go to https://forms.strathmore.ca/Permit-Inspections for each of the stages listed below. THE INSPECTION MUST BE ARRANGED 2 - 3 WORKING DAYS IN ADVANCE.

A Building Permit is valid for one year from the date of issuance.

If your project is not completed within the one year time limit, an extension must be applied for in writing to development@strathmore.ca. The proposed completion date must be included.

RESIDENTIAL BASEMENT DEVELOPMENT

FRAMING INSPECTION

Arrange when the following are complete:

Walls are framed, Heating and ventilation ducts are installed, Exhaust ducts to exterior are installed,

Bedroom egress windows are installed, and

Plumbing & electrical inspections have been done.

AND

FINAL INSPECTION

Arrange when the following are complete:

Ceiling is installed,

Walls are painted,

Doors and trim are installed,

Heat registers and vent covers are installed, and

Electrical and plumbing are complete.

Please note * Separate permits and inspections are required for plumbing, gas, and electric. These Permits are applied for at the Town Office and inspections are booked through the Town's website as noted above. The inspection will be undertaken by Park Enterprises Ltd.

2021 Basement Development Information Sheet based on National Building Code 2019 – Alberta Edition

StrathmoreRURAL REIMAGINED

(to be completed and submitted with Building Permit Application)

I. ADDRESS OF HOUSE				
II. DRAWING REQUIREMENTS				
 The layout of the basement with approximate room sizes shown on the drawing? 	Yes □			
2. Intended use of each room shown on drawing?	Yes □			
3. The location of the stairs shown on the drawing?	Yes □			
4. The location of smoke alarms and carbon monoxide detectors shown.	Yes □			
The location of heat ducts shown on drawings.	Yes □			
6. Size, type and location of bedroom windows shown on drawings.	Yes □			
III. FRAMING OF WALLS				
1. Wood framing members supported on the concrete floor are to be:				
a) pressure treated with a wood preservative OR	Yes □ N/A □			
b) installed over a min 0.05 mm (2 mil) polyethylene film	Yes □ N/A □			
2. Wall studs shall be continuous for the full storey height except at	Yes □			
openings and shall not be spliced.				
INCLU ATION AND AIDWADOD DADDIED				
INSULATION AND AIR/VAPOR BARRIER Existing frost walls at perimeter of basement are complete with insulation	1			
and 6 mil poly air/vapor barrier. Stud size & spacing and insulation	Yes □ No □			
thickness of existing perimeter walls noted on drawing.				
All holes, tears and gaps in 6 mil polyethylene air/vapor barrier to be sealed	Yes □ N/A □			
prior to covering.	1			
Insulation located in areas where it may be subject to mechanical damage is	Yes □ N/A □			
to be protected by a covering such as gypsum board or plywood. This				
includes areas within 1 meter (3.3 feet) of the furnace, hot water heater, and washer and dryer.				
washer and aryor.				
SMOKE ALARMS IF NO BEDROOMS WITH BASEMENT	No bedrooms □			
DEVELOPMENT	INO Dedicoms			
A minimum of one interconnected smoke alarm is required in a basement where no bedrooms				
are being proposed. Smoke alarms to be at least 1 metre away from bathroom doors.				
BEDROOM DETAILS TO BE SHOWN ON DRAWING (if no bedrooms, go ventilation)	to heating &			

1.	Fresh air supply (supply duct from furnace) to each bedroom shown on Drawing?	Yes □
2.	Location of Smoke Alarm (interconnected) shown on drawing and located:	Yes □ No □
	a) within each bedroom, and	
	b) in a location between the sleeping rooms and the remainder of	
	the basement, and	
	c) within the hallway leading to the bedrooms (if a hallway exists).	
	noke Alarms to be at least 1 metre away from bathroom doors.	
3.	Location of Carbon Monoxide Detector (interconnected) shown on	
	drawing:	
	a) inside each bedroom OR	
	b) outside each bedroom within 5 meters of the bedroom door.	
	SMOKE ALARM AND CARBON MONOXIDE DETECTOR CAN BE COM S WHERE THEY SHARE A LOCATION.	IBINATION
4.	Egress window openable area identified on Drawing (usually the area	Yes □ No □
	of the screened mesh) and the egress area is required to meet both:	162 110
	a) minimum dimension not less than 380 mm (15 inches) and	
	b) minimum open area not less than .35 m² (540 inch²)?	
The	type of window is to be noted, ie horizontal slider, etc.	
	If a window well is required, minimum horizontal distance of 760 mm	V
	(30 inches) from face of glass to window well shown on drawings?	Yes □ N/A □
	(00 monoc) nom race of glace to minach from cheminger	
HEAT	ING AND VENTILATION	
	TING AND VENTILATION A warm air supply outlet is required to each room with an exterior wall	Voc. 🗆
	A warm air supply outlet is required to each room with an exterior wall	Yes □
1.	A warm air supply outlet is required to each room with an exterior wall (this includes walk-in closets) and shown on the drawing.	
1.	A warm air supply outlet is required to each room with an exterior wall (this includes walk-in closets) and shown on the drawing. Joints in new ventilation system ducting shall be sealed with mastic or	Yes □ Yes □
1. 2.	A warm air supply outlet is required to each room with an exterior wall (this includes walk-in closets) and shown on the drawing. Joints in new ventilation system ducting shall be sealed with mastic or metal foil duct tape.	Yes 🗆
1. 2. 3.	A warm air supply outlet is required to each room with an exterior wall (this includes walk-in closets) and shown on the drawing. Joints in new ventilation system ducting shall be sealed with mastic or metal foil duct tape. Return air duct provided to basement with location shown on drawing?	Yes □ Yes □
1. 2. 3.	A warm air supply outlet is required to each room with an exterior wall (this includes walk-in closets) and shown on the drawing. Joints in new ventilation system ducting shall be sealed with mastic or metal foil duct tape. Return air duct provided to basement with location shown on drawing? Return air to be provided by 3/4" gap under bottom of door to a room if	Yes 🗆
1. 2. 3. 4.	A warm air supply outlet is required to each room with an exterior wall (this includes walk-in closets) and shown on the drawing. Joints in new ventilation system ducting shall be sealed with mastic or metal foil duct tape. Return air duct provided to basement with location shown on drawing? Return air to be provided by 3/4" gap under bottom of door to a room if return air duct not provided inside room?	Yes □ Yes □
1. 2. 3. 4.	A warm air supply outlet is required to each room with an exterior wall (this includes walk-in closets) and shown on the drawing. Joints in new ventilation system ducting shall be sealed with mastic or metal foil duct tape. Return air duct provided to basement with location shown on drawing? Return air to be provided by ¾" gap under bottom of door to a room if return air duct not provided inside room? Bathroom exhaust to be ducted to outside? Shown on drawing.	Yes □ Yes □
1. 2. 3. 4.	A warm air supply outlet is required to each room with an exterior wall (this includes walk-in closets) and shown on the drawing. Joints in new ventilation system ducting shall be sealed with mastic or metal foil duct tape. Return air duct provided to basement with location shown on drawing? Return air to be provided by 3/4" gap under bottom of door to a room if return air duct not provided inside room?	Yes Yes Yes Yes

Fire Safety Plan

THIS PLAN MUST BE POSTED ONSITE AND OCCUPANTS/EMPLOYEES ARE EXPECTED TO BE TRAINED IN HOW TO FOLLOW ITS PROVISIONS
Building Permit #Address:
Building Name (if applicable):
Description of Project: Basement Development
Contact Personnel:Phone #:
 Specific Considerations: Fire extinguisher(s) will be available at all times during the progress of the construction Access to fire hydrants and buildings for fire apparatus must be maintained
Emergency Response Numbers: FIRE/POLICE/AMBULANCE: 9-1-1
 General Considerations: A WARNING SYSTEM will be in place to warn of potential threats, and facilitate evacuation (yelling, ringing of a bell or horn, etc.)
 EVACUATE via the nearest exit if you are warned of a fire
 PROCEED to the main entrance (outside) and report to the Fire Department
 FIGHT the fire ONLY if it is small and you are NOT ALONE
Hazards Control:
 At the end of each day combustible refuse will be cleared from the site area and disposed of in bins or stored in neat piles. Unused construction material will be kept neat and orderly.
 No open-flame devices will be used inside buildings unless a dedicated watch is in place
 Liquid Propane Tanks or flammable liquids containers are not allowed within buildings
This Fire Safety Plan is designed in conformance with and is a requirement of Division B, Section 2.8.2 of the Alberta Fire Code, and on signature, becomes an agreement between the building owner/contractor and the Town of Strathmore Fire department.
Building Owner/Contractor Name: Print name
